Listing of Claims

The following listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Currently amended) A method performed by a computer system, comprising: storing a version of a mass-produced printed paper, including a first location within the paper, and

forming a link within the version between a the first location within the paper and a second location, the version being displayable on a display device as a likeness of the paper, and the first location being: displayable on the display device as part of the likeness; highlighted to indicate the link; and selectable by a user to cause an operation associated with the second location and including an indicator for highlighting the link within the displayed version.

(Previously presented) The method of Claim 1 and comprising:
 on the display device, displaying a first selector associated with a first portion of the paper;

on the display device, displaying a second selector associated with a second portion of the paper; and

on the display device, displaying a likeness of the first portion in response to a selection of the first selector.

3. (Previously presented) The method of Claim 1 and comprising: receiving a watch list term; searching the version for the watch list term; and displaying a result of the searching.

- 4. (Previously presented) The method of Claim 3 and comprising: in response to a selection of the result, displaying a likeness of a portion of the paper associated with the selected result on the display device.
- (Currently amended) The method of Claim 1 and comprising:
 on the display device, in response to a user command, performing a pan function on the displayed-likeness.
- 6. (Currently amended) The method of Claim 1 and comprising:
 on the display device, in response to a user command, performing a zoom function on
 the displayed-likeness.
- 7. (Previously presented) The method of Claim 1 and comprising: in response to a selection of a portion of the version, displaying the portion on the display device as a likeness of the paper in an enlarged format.
- 8. (Currently amended) The method of Claim 1, wherein the first location is highlighted by an indicator to indicate the link, and comprising:
 in response to a user command, selecting a type of the indicator.
 - .
 - 9. (Currently amended) A system, comprising: a computing device for:
 - storing a version of a mass-produced printed paper, including a first location within the paper; and
 - forming a link within the version between a the first location within the paper and a second location, the version being displayable on a display device as a likeness of the paper, and the first location being: displayable on the display device as part of the likeness; highlighted to indicate the link; and selectable by a user to cause an operation associated with the second location and including an indicator for highlighting the link within the displayed version.

10. (Previously presented) The system of Claim 9 wherein the computing device is for:

on the display device, displaying a first selector associated with a first portion of the paper;

on the display device, displaying a second selector associated with a second portion of the paper; and

on the display device, displaying a likeness of the first portion in response to a selection of the first selector.

11. (Previously presented) The system of Claim 9 wherein the computing device is for:

receiving a watch list term; searching the version for the watch list term; and displaying a result of the searching.

12. (Previously presented) The system of Claim 11 wherein the computing device is for:

in response to a selection of the result, displaying a likeness of a portion of the paper associated with the selected result on the display device.

13. (Currently amended) The system of Claim 9 wherein the computing device is for:

on the display device, in response to a user command, performing a pan function on the displayed-likeness.

14. (Currently amended) The system of Claim 9 wherein the computing device is for:

on the display device, in response to a user command, performing a zoom function on the displayed likeness.

15. (Previously presented) The system of Claim 9 wherein the computing device is for:

in response to a selection of a portion of the version, displaying the portion on the display device as a likeness of the paper in an enlarged format.

- 16. (Currently amended) The system of Claim 9, wherein the first location is highlighted by an indicator to indicate the link, and wherein the computing device is for: in response to a user command, selecting a type of the indicator.
- 17. (Currently amended) A computer program product, comprising:
 a computer program processable by a computer system for causing the computer system to:
 - store a version of a mass-produced printed paper, including a first location within the paper; and
 - form a link within the version between a the first location within the paper and a second location, the version being displayable on a display device as a likeness of the paper, and the first location being: displayable on the display device as part of the likeness; highlighted to indicate the link; and selectable by a user to cause an operation associated with the second location and including an indicator for highlighting the link within the displayed version; and

an-apparatus from which the computer program is accessible by the computer system.

18. (Previously presented) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

on the display device, display a first selector associated with a first portion of the paper;

on the display device, display a second selector associated with a second portion of the paper; and

on the display device, display a likeness of the first portion in response to a selection of the first selector.

19. (Previously presented) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

receive a watch list term; search the version for the watch list term; and display a result of the searching.

20. (Previously presented) The computer program product of Claim 19 wherein the computer program is processable by the computer system for causing the computer system to:

in response to a selection of the result, display a likeness of a portion of the paper associated with the selected result on the display device.

21. (Currently amended) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

on the display device, in response to a user command, perform a pan function on the displayed-likeness.

22. (Currently amended) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

on the display device, in response to a user command, perform a zoom function on the displayed-likeness.

23. (Previously presented) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

in response to a selection of a portion of the version, display the portion on the display device as a likeness of the paper in an enlarged format.

24. (Currently amended) The computer program product of Claim 17, wherein the first location is highlighted by an indicator to indicate the link, and wherein the computer program is processable by the computer system for causing the computer system to: in response to a user command, select a type of the indicator.
